

PRODUCT INFORMATION

How to extend the life of your Heavy Vehicle Stand

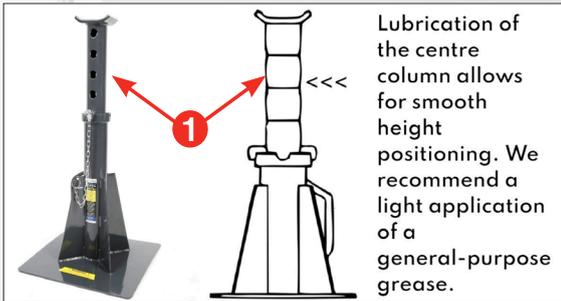

8 Top Tips

to extend the life of your **TQB BRANDS Borum Pin Type Vehicle Stand**

Includes Models:
15TJS,
15TJSSHORT,
25TJS,
25TJSSHORT

1 Regularly lubricate the Centre Column.

Lubrication of the centre column allows for smooth height positioning. We recommend a light application of a general-purpose grease.

2 Borum 15- and 25-ton stands come with a solid pin type locking device attached to the body with chain.

Once the correct height is reached, extend the centre column then insert the locking pin prior to lowering a vehicle onto the stand.

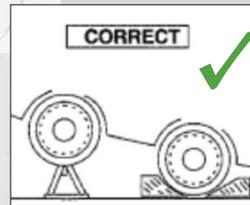

3 Borum Pin Type Vehicle Stands must be used on a smooth horizontal surface.

Pin Type Vehicle Stands rely on a smooth flat horizontal surface to remain stable and minimise lateral forces. When raising a vehicle from an axle to place on stands the correct balanced lifting point must be used to prevent tipping or load collapse.

4 Securing the Vehicle.

A vehicle must have the park brake applied and the wheels chocked prior to raising to place a vehicle stand. Borum Pin Type Vehicle stands can only be used to support one end of a vehicle. The stability of a vehicle on stands is critical to the safety of personnel conducting repairs.

5 Correct Placement.

Borum Pin Type Vehicle Stands should always have the load cradle centrally positioned on the vehicle lift points. Consult the vehicle manufacturer for lifting & vehicle stand loading points prior to elevating or supporting a vehicle.

6 Garage Jacks ARE NOT substitutes for Vehicle Stands.

Jacks must be only used to raise a vehicle for the purpose of lowering on to Vehicle Stands prior to commencement of vehicle maintenance.

7 Personal Safety.

No persons should be in a vehicle that is supported by Vehicle Stands. Engine must be turned off. Testing of Drivetrain or running of Engines whilst a vehicle is on stands can create vibration and potential tipping of the vehicle.

8 Read the user Manual thoroughly and keep a copy easily accessible.

The user manuals are important to the initial set up and ongoing maintenance and come with each Vehicle Stand, they are also downloadable from our webpage at www.tqbbrands.com.au
