How to extend the life of your 500kg Auxiliary Lifter

9 Top Tips

to extend the life of
your **TQB BRANDS**
Auxiliary Lifter

Includes
Models:
2058T, 2068T

IMPORTANT INFORMATION

**NOT INTENDED FOR
SUPPORTING LOADS AND NOT
INTENDED AS A STAND-ALONE
TRANSMISSION LIFTER**

- 1** The TradeQuip 2058T and 2068T are designed as a lifting & aiding device for use in suspension, exhaust components and installation and removal of miscellaneous items such as fuel tanks.

- 2** Open the breather valve prior to use.

Opening the breather prior to operation ensures the efficient hydraulic operation of the lift ram and pump preventing pump and ram cavitation resulting in poor operation and or possible hydraulic oil loss.

- 3** Regularly lubricate the Ram Gland, Pivot Points and Castors

Regular application of lubrication of all pivots, pins, adjusters, castor wheels and the grease nipple installed at the ram gland will ensure smooth operation during raising and lowering.

- 4** Hazards and Obstructions.

All wheeled TQB Brands equipment must be used on smooth surface free of cracks, crevices and tripping hazards that can foul the wheels during operation or relocation.

- 5** Always store in the fully lowered position.

Storage in the lowered position ensures the lift ram assembly is sealed from exposure to weather fluctuations and keeps the hydraulic ram seals in a relaxed condition ready to work when required.

- 6** Cleanliness equals safety and long life.

Cleanliness equals safety and long life from your equipment and its accessories. Regular cleaning of dirt and dust from your auxiliary lifters mechanical fixtures, accessories and attachments will ensure long life and safe operation.

- 7** Long term load holding.

Where long term load holding is required, we recommend the use of our 1198T 650Kg Capacity Mechanical Under Hoist Auxiliary Stand.

- 8** Read the users Manual thoroughly and keep a copy easily accessible.

The users manuals are important to the initial set up and ongoing maintenance and come with each Auxiliary Lift, they are also downloadable from our webpage at www.tqbbrands.com.au

- 9** Visit our webpage for instructional videos.

We have created instructional videos for our range of Hydraulic equipment which include bleeding procedures and product comparisons. You'll find these at www.tqbbrands.com.au
